

# HELP PREVENT PRESCRIPTION MISUSE

ScripGuard™

## A NEW WAY TO COMBAT THE AMERICAN OPIOID CRISIS

### A NEXT-GEN PRODUCT FOR SAFE PAIN MANAGEMENT AND PRESCRIPTION USE

ScripGuard™ is a compact, reusable device that intervenes at the source of opioid misuse. The device is loaded by the pharmacist and its timing system dispenses medication directly to the patient, at the appropriate time and in the prescribed amount.

This tamper-resistant, child-safe device is locked when the prescription expires. Damage to the device may be reported to the physician.

### STOP THE CYCLE

America is battling an epidemic of opioid use disorders with unprecedented death rates and substantial healthcare and litigation costs. ScripGuard™ disrupts the cycle by intervening before prescription misuse and dependency begin.

The outdated orange bottle doesn't work for addictive prescriptions.

191 million opioid prescriptions written in 2022.

80,250 opioid overdose deaths in 2021.

Opioids involved in 7 of 10 overdose deaths.

Opioids cause 50% of fatal poisonings among children 5 and under.

80% of heroin users started using prescription opioids prior to using heroin.

Total economic burden of opioid misuse in the U.S. was \$696 billion in 2018.
